

## International Academy of Gnathology The Dr. William H. McHorris Award

**DESCRIPTION:** Table clinics have always been an essential part of the biennial Congress of the International Academy of Gnathology, American Section. In 2009, the Academy initiated a competition between dental graduate students participating in table clinic sessions. The winner, as judged by the Academy's Program Committee, receives the McHorris Award, which was created in recognition of Dr. William "Bill" McHorris for his many contributions to the study of occlusion, the diagnosis and management of temporomandibular dysfunction, and advanced restorative dentistry; his lifelong dedication to helping countless students of dentistry; and his commitment to the ongoing success of the Academy.
